

Simon DeLibero

Tacoma, WA || (253) 682-7319 || Simon.delibero@plu.edu || [linkedin.com/in/simon-delibero-2b090b2b2](https://www.linkedin.com/in/simon-delibero-2b090b2b2)

Education:

Bachelor of Science in Applied Physics, Pacific Lutheran University 05/2027

Minor in Mathematics

Academic Scholarship Recipient

MCM Mathematical Modeling Competition 2023-25

Dean's List

Chemistry Club

NSSURP Summer Research
Program '26

Math Club

Summer Research in Computer Science 03/2026 to present: Bioinformatics and Machine Learning. I got to learn about protein, RNA, and protein-RNA hybrid structures through trying to predict structure and judge structural quality, while at the same time learning about Neural Networks and their architecture (MCMLGNN's, traditional GNN's, PINN's, KAN's, VIT's, LLM's, etc). The years of chemistry wet-lab experience using NMR, GCPMS, UV-Vis Spectroscopy, ChemDraw, IgorPro, and interpreting TEM data gave my team and me a distinct advantage in building and refining bespoke features for the Cerana project.

Fife High School

Membership in: NHS (3 years) and Key Club (3 years [Jr. Class Rep, Secretary])

Recipient of Academic, Athletic, and Merit-based Scholarships

Work Experience:

Reynolds Lumber, VA 03/2025 - 08/2025 Sawmill Technician, Carpenter

- Worked at a sawmill and didn't lose a finger. Cut, planed, dried, and used various wood types in conjunction while optimizing workflow and building to spec with consistent precision and accuracy. I crafted custom furniture for sale using electric and pneumatic tools, drawing on chemistry and physics experience to optimize production efficiency and output quality.

H&H Diesel 06/2024 - 08/2024 Diesel Mechanic || JL Multicare & Bucky's Automotive 01/2023 - 06/2024 Mechanic

- Tested engine components to manufacturer-designated specifications, rebuilt and reset fuel injectors (Piezoelectric, Common-Rail, and Power-Stroke), and performed more general vehicle maintenance. For engines ranging in size from 2 to 8 cylinders, successful repairs and diagnostics were completed on the following systems: electrical, cooling, intake, exhaust, filtration, braking, steering, drive-train, and OBD.

BGSF Repair, Maintenance, and Construction 06/2023 - 03/2024) Maintenance Engineer

- Facilitated the completion of multi-stage diagnostics, root-cause analysis, and repair with minimal oversight. Responsibilities included electrical repair, troubleshooting, wiring and diagnostics, fire and carbon-monoxide alarm maintenance and installation, appliance maintenance and installation and removal, dry-wall installation and repair, painting, framing, fencing, and more customer-facing direct service.

Larson and Associates 06/2022 - 01/2023 Engineering and Drafting Technician

- Gained experience with AutoCAD Civil 3D (2019 and 2023) and experience preparing road plan and profile drawings, topographic surfaces, and both residential and commercial 'plat' maps. Responsibilities included maintaining quality control, keeping the work on schedule and within budget while setting up projects, downloading and formatting field data, and preparing maps and exhibits to represent the company in a positive way.

Pacific Lutheran University Tech Help Desk 02/2021 - 08/2021 Help Desk Technician

- Routinely undertook and assisted in the troubleshooting of hardware and software issues, the roll-out of preventative maintenance updates and new equipment, and a workspace overhaul while addressing and coordinating with team members to resolve Help-Desk Tickets in a timely and appropriate manner.

Club Z Multi-subject Tutor October 2024 - May 2024

- When I was first hired, the program couldn't attract student participation, and by the time I left, there were more than a dozen consistently returning learners. Everything from simple mechanisms to magnetism, intro to pop-sci was a program that successfully fostered a culture of lifelong exploration through demonstrations, puzzles, and activities that allow students to build intuition about and interest in science. That interest was further kindled by the 'Science Stacks' lending library program I established as part of the program. Interactive demonstrations and a responsive curriculum led to both parents and students being able to participate, as they did routinely by the end of my tenure there.

Skills:

Applied Physics, Mathematics, Chemistry, Electrical Repair, Troubleshooting, Wiring, Alarm & Appliance Maintenance, Dry-wall, Painting, Framing, Fencing (boards and swords), Carpentry (industrial, finish, and cabinetry), Mechanic (Diesel, gas, DC, and AC systems), Diagnostics (ODB & RC), AutoCAD Civil 3D, LTSpice, VBA, Java, Python, R, LaTeX, AutoLISP, LoggerPro, IgorPro, Piano, Trumpet, Hand-tools, Power-tools, Hydraulic/Pneumatic-tools, Welding (MIG, TIG, and electrical soldering), Drill Presses, Lathes, ODB scanners, Multimeters, Oscilloscopes, NMR, GCPMS, UV-Vis Spectroscopy, TEM data, Fuel Injector Testing, and I speak and write English, Spanish, and Latin.
